EDUCATION

University of Nevada - Las Vegas

Bachelor of Science in Computer Science, **GPA: 3.85/4.0**; Dean's Honor List

Las Vegas, NV

Aug. 2023 – Dec. 2026

TECHNICAL SKILLS

Languages: Python, C/C++, C Sharp, SQL, JavaScript, TypeScript, HTML/CSS

Frameworks/Libraries: .NET, React, Node.js, Flask, WordPress, Material-UI, pandas, NumPy, Matplotlib, PyTorch

Developer Tools: Git, AWS, Azure, Claude, VS Code, Visual Studio, PyCharm, Convex, ArcGIS, Mapbox

EXPERIENCE

AI Software Engineer Intern

June 2026 – Present

Symphonix Systems

Henderson, NV

- Assess development workflows for **AI agents**, evaluating agent behavior and identifying gaps in the development and testing process
- Review **MongoDB and SQL** databases powering model pipelines, validating data integrity and structure for training and testing datasets
- Developed **17 single-purpose AI agents**, each scoped to one specialized task, and verified task success through structured testing and output validation

Application Development Intern

Sep. 2025 – Present

Harry Reid International Airport

Las Vegas, NV

- Developed full-stack .NET applications and console tools tracking airfield operations and consumer traffic data, deploying to **Azure and on-prem servers**
- Built REST APIs and managed **Microsoft SQL Server** databases, designing tables and queries to streamline data collection across airport systems
- Helped develop **ArcGIS** mapping applications visualizing every airport across the Clark County district, supporting operations and planning teams

Web Developer Intern

May 2025 – Aug 2025

Hooli Software

Seattle, WA

- Built and launched **3 e-commerce websites** using WordPress and Oxygen Builder, designing front-end mockups in **Figma** and implementing responsive layouts for client businesses

PROJECTS

Fomo | TypeScript, React Native, Convex, Python, Mapbox, Clerk

Jan. 2026 – May 2026

- Built a cross-platform events app for **web, iOS, and Android** in a monorepo with a real-time Convex backend; won **1st Place** at UNLV's Senior Design competition
- Developed an automated Python pipeline ingesting events from the Ticketmaster API into Convex, surfacing paid events alongside user-created listings for greater variety across **3 platforms**

Podz Liability Fund | Python, PyTorch, YOLO, Flask, pandas, NumPy

Jan. 2026 – May 2026

- Architected a multimodal system of **5 ML models** (BiLSTM, CNN, fusion network, XGBoost, per-player ensemble) predicting NBA points-prop outcomes across **1,400+ game sequences**
- Improved AUROC **4.7%** over baseline via ensemble modeling; deployed a Flask REST API on Render serving daily confidence-ranked predictions

Rebel Locate | Python, PyTorch, torchvision, Shapely, Pillow (EXIF), NumPy

Jan. 2025 – May 2025

- Developed a KNN geolocation model predicting campus buildings from EXIF metadata with **99.06% accuracy**, fine-tuning an AlexNet CNN to classify photo locations at **82.42% accuracy**

LEADERSHIP

President

Feb. 2026 – Present

UNLV Association for Computing Machinery

Las Vegas, NV

- Led a **10 member** executive board and drove a **20%** increase in membership, organizing **15+ campus-wide events** and authoring onboarding documentation for new members

Engineering Mentor

Aug. 2024 – Present

University of Nevada - Las Vegas

Las Vegas, NV

- Mentored **30+ prospective engineering students** per semester through weekly lab discussions, guiding project design from concept through final presentation
